This application is in condition for allowance except for the presence of claims 18-20 are directed to an invention non-elected without traverse. Accordingly, claims 18-20 been cancelled.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In the claims—

Cancel claims 18-20.

All species have been searched.

The following is an examiner's statement of reasons for allowance: Kusano et al. '652 does not clearly teach or suggest the feeding of hydrogenated block copolymer having a density of 0.15 ~ 0.25g/cc by itself but rather teaches that the block copolymer should be combined with additives such as softening agents and dry blended with other polymers prior to feeding to an extruder (see for instance the examples and elsewhere in Kusano). The instant claims of course do not preclude mixing of other materials with the block copolymer prior to feeding to an extruder so long as the "hydrogenated block copolymer fed to the extruder has a packed bulk density of 0.15 ~ 0.25 (g/cc)". Patentees however provide no guidance regarding bulk densities of the block copolymer after mixing with other materials and most processes of combining softeners and dry

Art Unit: 1765

blending would be expected to substantially change the bulk density of the material of Kusano in that polymers are known to swell on contact with material they can absorb and mechanical mixing would be expected to increase the bulk density by crushing the porous block copolymer of patentees. Kusano of course provides no process details regarding production of polyphenylene ether/polyamide/block copolymer/ other optional additive blends and it can therefore not be said that patentees disclose by way of inherency any particular density of block copolymer for addition to an extruder (much applicants densities) nor is there any suggestion of using applicants densities in applicants process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
